## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 21, 23-33, 35, 36, 40, and 42-48 drawn to columbarium/method, classified in class 52.
  - II. Claims 11-20, 22, 34, 37-39, and 41, drawn to a device/method, classified in class 27.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. For example, combination claim 1 only recites an urn enclosing a predetermined volume, while subcombination claim 11 recites an urn comprising a first wooden portion defining the remains cavity and a vented lid. The subcombination has separate utility such as a stand-alone urn.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3677

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
